

Project Details

Assessment

- Assignments
 - Three assignments submissions worth 20%
 - Final Report submission worth 30%
 - The implementation worth 50%

Development

- Group work
 - Team formation: this week
 - Project design: 4 weeks
 - Project development: 4 weeks
- Submissions
 - Assignment 1: 13th June
 - Assignment 2: 20th June
 - Assignment 3: 27th June
 - Project submission and Final Report: 24th July

Final Report

Final report should state the following:

- Name of team, and names of team members
- Project description (requirement and specifications as you see them)
- Project Design (discussion of key issues, your approach to be taken)
 - Include use cases, domain model, sequence diagrams
- Implementation Description (class diagrams, etc.)
- Assignment of team members to major project roles
- A Gantt chart describing the schedule of development
- Analysis of Success / Failure (what you did/didn't implement, and why)
- Discussion of additional features (draw attention to extra/clever elements)
- Team analysis: who did what, and how much (breakdown of effort)
- Overall size about 20-25 pages

Useful Advice

- Hosting
 - If public, use free service (obviously), need to provide me with admin access to all services (24th July – 8th August)
 - If local, need to provide me with **detailed(!!)** guidelines of how to set up your system on my machine
- Extra documents to submit with final code and report
 1. Detailed guidelines of how to set up system
 2. Detailed user manual to direct me through all functionalities of your system

Very important that you provide as much details as possible to me so that I can give you marks for all the work you have done

More...

- Use any programming language or web development framework
 - Need to provide me with all details of how to set up or use it
- Can use other software for frontend (calendar UI)
 - Cannot use other software to provide the programming logic for the solution to project requirements and functionality
